Description

Basalt of Bolsena is a platinum gray stone with some leucite crystals immersed in a paste with a microcrystalline structure which is sometimes compact and sometimes has elegant flowing lines. Basalt is a well-structured material with excellent workability characteristics and excellent mechanical qualities in all conditions of use.

Thanks to its compact structure, this stone does not necessarily need to be grouted, unlike other lava stones with open holes.

Available both slabs and finished;

- Raw, untreated
- Smooth

- Filled and Honed
- Glossy
- Filled and Polished
- Brushed
- Bush-hammered
- Sandblasted

Usage and applications:

- Indoor and outdoor flooring and cladding
- Bathroom furniture
- Kitchen furniture
- Stairs
